

Pedal Cars

As supplied

The pedal cars are fantastic fun for the kids. These popular items have been turned into strollers/pushers, traditional pedal cars, electric cars and even remote control!

Pedal Car - \$286

Flames are etched into the side of the body, making it very simple when it comes to painting. Or just paint right over the top.

A floor pan comes with every pedal car. From our own experience with littlies, the floor pan is safer for little feet and makes the car easier to build. The body fits straight over the top.

A chassis can also be supplied to suit your needs. Please contact us for more information.

The body is based on a 1936 Ford. The length is 1160mm and the width is 490mm.

Some examples of completed pedal car bodies
